

INTERVIEW

Which field you're going for?

I am going for bachelors in Computer science.

Why Germany?

I chose Germany because of its high quality education with no tuition fee. Also Germany stands among world's attractive countries especially for International Students.

Why Germany and not USA or Canada?

In Germany education is free of cost while in USA or Canada I have to pay huge amount of fees.

You made block account.. you can use it?

Block Account is that amount I can use for my needs and also it's a one time investment. On the other hand for USA or Canada I have to pay huge amount after each semester.

So you're going for Computer science?

Yes.

What is Computer science?

Computer science is the study of computers and computing as well as their theoretical and practical applications. It applies the principle of mathematics, engineering, algorithm, software and hardware development and artificial intelligence.

What is Technology?

Technology is the application of science to solve problems.

What is Algorithm?

An algorithm is a rule or step by step process that must be followed in order to solve a particular problem.

What is Artificial intelligence?

Artificial intelligence (AI) is the ability of a computer or a robot controlled by a computer to do tasks that are usually done by humans because they require human intelligence. The main aim of AI is to solve problems in a way that are better and faster. Stanford's John Mc carthy seminal figure of AI dies at 84.

Types of artificial intelligence?

There are 3 types of AI :

1. Artificial Narrow Intelligence
2. Artificial General Intelligence
3. Artificial Super Intelligence

What is HTML?

HTML stands for Hyper Text Markup Language. It is the standard markup language for creating Web pages.

What is CSS?

CSS stands for Cascading Style Sheet. It is a style sheet language. It can format the documents content (written in HTML or other markup language).. layout, color, fonts etc.

What is JAVA?

JAVA is a widely used high level class based programming language it is designed by James Gosling. It is first released in 1995.

What is PYTHON?

PYTHON is also a widely used programming language often used to build website and software automate tasks and conduct data analysis. It is designed by Guido van rossum. It is first released in 1991.

What is programming language?

A programming language is a collection of grammar rules use for giving instructions to computer.

How many types if programming language?

There are 3 types of programming languages:

1. machine language

2. assembly language
3. high level language

Names of programming language?

JAVA, PYTHON, JAVASCRIPT etc.

Why Germany not norway or italy?

German University rankings are top in the world and living expenses are also cheap as compare to norway or italy.

What university do you plan on studying at and where is that?

Technical University of Clausthal, Clausthal Zellerfeld, Lower Saxony.

Why TU Clausthal?

Because its one of the best university to study especially in my course and i am not going there for part time jobs my parents will support me financially so i don't need to worry about jobs.

Why this city?

Clausthal Zellerfeld has all the advantages of a small close knit community, no big city hustles and its easy to get around.

What's your Major?

Computer science.

Why did you choose Computer science?/Why did you choose this specific program? Is it relevant to previous studies?

I chose Computer science because its getting wide day by day the future is all about technologies. Yes it is.

Is this your first time at Germany?

yes.

Do you know anyone in Germany?

no.

What do your parents do?

my father is a government servant and my mother she's a house wife.

How are you gonna support yourself financially?

my parents will support me.

What are your plans after you graduated b

I would be interested to get an internship opportunity in Germany but afterwards i would like to come back to my country.

How can you guarantee that you'll go back to your country?

All my family are here in my country, i don't have any family there so yeah definitely i will come back.

Isn't this course offered by any university or college in your country?

Yes but the quality of education is not so good inhere plus fees of good institutions are very high that's why Germany is my priority.

What is your motivation and settlement plans?

Motive is just study to give full time to my studies i want to boost my educational career and then will come back to my country as my parents are here.

How many borders does Germany have?

Germany have borders with 9 countries.

Do you speak German?

yeah a bit.

How did you find about your university?

Through educational groups.

Which other universities you've applied to?

I applied to Marburg and a university in Berlin.

Can you tell me some facts about your university?

- [] Technical University of Clausthal, Clausthal Zellerfeld, Lower Saxony.
- [] 40% foreign students from more than 100 countries
- [] it is divided into 3 faculties, 34 institutions and 6 scientific centres
- [] Professor dr Joachim Schachtner President of university
- [] in 1775 it was founded as Clausthal mining school
- [] technical university since 1968
- [] courses it offers are ME, process eng., mathematics, CS, natural and material sciences, economics.
- [] world rank 1688 and national rank 68 as per 2019-2020 report
- [] Tu clausthal is a strong research university with outstanding national and international networks.

What's the duration of your course?

one module is about 2.5 months.

What is the scope of your course?

My course is the most scopic field a computer science engineer doesn't need to stress about 9 to 5 type jobs like he can do freelancing or for a starter pack he don't have to build factory something he can work in any software house.

What benefits this course brings around you?

With the high demands of computer science and technology in the industry, computer science

and engineering courses have gained potential which land students in various positions like system analyst, web developer, finance programmer, software engineer, game developer and many more.

Who's your sponsor?

my father.

What you do after block account?

my parents will gonna support me i will just focus on my studies.

When will your course starting?

17 October and 17 December.

What is the amount of Block account?

10332 euros and now 11208 euros.

what amount will you receive each month?

861 euros and now 934 euros.

Why you want to study whole bachlors in German which will take most of your time when you can just study here in Pakistan?

Because i want international exposure and language is not a barrier i did a2 level i like to learn international languages and in future definitely i will come back and ofc i will not forget english language so that's not a problem

What type of job will you do in your future?

Right now I have no such plans because i just want to concentrate on my studies but yeah i would be interested in doing jobs related to AI in future but its just a plan for now it can be change in future as i am not concern about jobs right now.

When will you return to Pakistan? Or are you going to permanently stay in Germany?

Pakistan is my birthplace, my homeland. Why would I ever think of leaving this country?

But, Yes this is also true that I wish to go abroad for my studies and career growth. As my field is really high in demand in European countries and USA, I opt for Europe (Germany because of its "free/ no / very less tuition fees concept"). As USA is extremely expensive for me now. And that is why Germany is preferred by many career aimed engineers. Once I am all done with my studies and career goals I'll return to Pakistan to my family for sure. How can a person permanently leave his place where his childhood was spent with loads of memories?

But sacrifices are must for continuous improvements.

As Germany is the best country in Europe for engineers and specifically IT, I would definitely work there (if I ll be fortunate enough to have a job). Paying back to Germany for about 4-5 years is something I consider as my ethical and social responsibility as they are going to invest in me with their highly advanced studies.

What about your enrollment?

German Question :

Wie heissen sie?

Ich heiße Abeera.

Wie alt bist du?

Ich bin achtzehn Jahre alt.

Was ist dein Beruf?

Ich bin Studentin.

Wie geht es Ihnen?

Es geht mir gut, danke.

Wie ist Ihr Name?

Mein Name ist Abeera.

Du bist ledig oder verheiratet?

ich bin ledig.

Was sind dein hobby?

Mein hobby sind bucher lesen und malen.

Wie viel geschwester haben sie?

ich habe eine geschwester.

Magst du gamuse?

ja, ich mag gemuse essen.

Was ist deine Lieblings farbe?

mein Lieblings farbe ist lila.

Was ist ihr Lieblings essen?

mein Lieblings essen ist pizza.

Warum gehst du nach Deutschland?

ich gehe nach Deutschland weil es ein zentrum für meine kurs ist und eines der besten länder zum studieren ist.
